Supporting a Longstanding
Montana-based Company

Disclaimer: Blackfoot's Integrated Access services are not available in all our service locations. may require a minimum level of service. Monthly charges are based on each individual customer's configuration and contract term. Long-distance services in Integrated Access Bundles are for Continental US, additional long-distance rate plans are available.

Blackfoot offers Integrated Access Bundled (IAB) services which provide business-class service combining voice and data over the same connection to your location. The ultimate result is the ability to lower your service cost and ensure the most reliable connection. Your voice calls are always given priority, while Internet (data) availability increases when phone use decreases. Blackfoot's Integrated Access services use several connection types depending upon your needs including T-1, ADSL or Ethernet.

- ✓ Our IAB combines voice and data (Internet) traffic onto a single connection for a single flat rate per month service.

- ✓ A wide range of data speeds to meet your requirements from 1.5Mb to 10Mb (*higher speeds available*).
- ✓ Scales from 3 to 48+ phone lines.
- ✓ Blackfoot's Integrated Access Bundles Include:
 - Unlimited Local Calling & 2000 Long-Distance Minutes
 - Local Phone Numbers for Direct Dial Employees (*Local DID*)
 - Advanced Calling Features
 - Unified Messaging (*manage voice mail & faxes in your email in box*)
 - Caller ID | Static IP Address | Directory Listing
 - Customer Web Portal Management Tool (*CommPortal*)
- ✓ Standard Connection to Your Phone Systems include:
 - SIP Trunks | Ethernet | PRI | POTS (*telephone service*)
